OMKAR DHERE

Cloud & DevOps Engineer ◊ Pune, Maharashtra ◊ +91 8208661847 ◊ omkardhere2005@gmail.com
linkedin.com/in/omkar-dhere ◊ github.com/dhereomkar

OBJECTIVE

Final-year B.E. Information Technology student (SPPU, 2027) with hands-on experience in AWS, Docker containerization, and Python. Built and deployed containerized web and AI applications on cloud infrastructure. Certified in AWS Cloud Computing (Udemy). Eager to contribute to DevOps and Cloud Engineering teams as a fresher or intern.

EDUCATION

B.E. in Information Technology 2023 – 2027
TCOER, Savitribai Phule Pune University (SPPU) ◊ CGPA: 8.0 / 10

Higher Secondary Certificate (HSC) 2022
Rajshri Shahu College ◊ 77.50%

Secondary School Certificate (SSC) 2020
Rising Star School ◊ 89.20%

SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, Lambda, CloudWatch) | GCP (basics)
DevOps & CI/CD: Docker | Git / GitHub | GitHub Actions | Jenkins (learning)
Infrastructure: Linux (Ubuntu) | Bash Scripting | Networking Fundamentals
Containerization: Docker | Docker Compose | Kubernetes (learning)
Scripting: Python | Bash/Shell | YAML / JSON (Learning)
Databases: MySQL | AWS RDS (concepts)
Tools: Git | GitHub | VS Code

EXPERIENCE

AI Intern JAN 2025 (1 Month)
CODEC TECHNOLOGIES ◊ Pune, Maharashtra ◊ Online

- Developed an AI-based Spam/Ham Email Detector as the primary internship project using Python and NLP techniques.
- Worked with Git and GitHub for version control; followed structured development and testing workflows.
- Gained exposure to real-world AI application development, model evaluation, and team collaboration practices.

PROJECTS

AI Spam/Ham Detector – NLP Classification App github.com/dhereomkar

- Built a Python-based email/SMS spam detector using NLP preprocessing (tokenization, stopword removal, stemming) and a Naive Bayes classifier.
- Trained and evaluated the model on a labelled dataset achieving high accuracy; deployed as a simple web interface using Flask.
- Managed source code with Git/GitHub; developed during internship at CODEC Technologies.

Tech Stack: Python · Flask · Scikit-learn · NLTK · Pandas · Git

Flask Docker App – Containerized Web Application github.com/dhereomkar

- Built a Python Flask web app with a user-friendly web interface and a /health endpoint for container uptime monitoring.
- Containerized the app using Docker for consistent deployment; wrote an optimized Dockerfile with layer caching.
- Set up a GitHub Actions CI/CD pipeline — automated pytest testing, Docker image build & push to Docker Hub on every git push.

Tech Stack: Python · Flask · Docker · GitHub Actions · Docker Hub · pytest

Gesture Recognition – Real-Time Hand Detection github.com/dhereomkar

- Built a real-time hand gesture recognition system using MediaPipe and OpenCV to detect and classify hand gestures via webcam.
- Developed a clean Python application with live video feed processing; packaged with Docker for consistent local deployment.
- Documented the project with a detailed README and containerized setup instructions; managed with Git/GitHub.

Tech Stack: Python · MediaPipe · OpenCV · Docker · Git

CERTIFICATIONS

- AWS Cloud Computing – Complete Course (Udemy, DEC 2025) — EC2, S3, IAM, VPC, Lambda, Cloud Architecture & Deployment
